📄 Product Description

UFL Hirose / IPX to RP SMA Jack, CLIP Pigtail forFRITZbox and Speedport router

U.FL-Hirose/IPEX to RP-SMA female pigtail with CLIP connector - perfect for FRITZ!Box and Speedport routers to connect an external antenna (outdoor or indoor).Product Description:

The VARIA modification set is for FRITZ!Box and Speedport router. With this CLIP pigtail you can use external antennas for greater signal strength and improved sensitivity, which enhances the reliability of the communication over short ranges, because the signals can be received more clearly, which in turn reduces retransmission caused by weak signal strength.The RG178 Cable:

RG178 coaxial cable with an impedance of 50 ohms. It is one of the most popular very thin RF coaxial cables for RF signal transmission. At 1 MHz it has an attenuation of 12 dB/m, at 2.4 GHz it has an attenuation of 2.5 dB/m. The cable jacket is made of FEP, which makes the RG178 suitable for professional applications even with a higher temperature range.

- Connectors: U.FL-Hirose/IPEX to RP-SMA female with CLIP connector
- Cable length 25 cm
- Cable type: RG178 low loss cable
- IPX32/U.FL-Hirose connector
