from 178,63 EURItem no.: 318256
shipping weight: 2.10 kg
Manufacturer: Fibaro

Product Description

Fibaro Home Center 2 (HC2) is the brain to the Fibaro Intelligence System and can be used with other existing Z-Wave automation devices. HC2 was designed and developed by our engineers, giving us the ability to implement many unique features never seen before in other Z-Wave gateways. HC2 redefines Z-Wave based home automation and introduces real Home Intelligence. Home Center 2 by Fibaro isn't just an electronic device. It's also well designed, innovative and user friendly interface, featuring functions never seen before. New possibilities thanks to Linked Devices. Home Center 2 Linked Devices function lets you combine multiple devices into one virtual device with combined functionality – for example 3 heater thermostats plus temperature and humidity sensors. The primary advantage of this feature is the convenience of being able to control multiple devices at the same time at the press of one button. The second advantage is reducing the number of device icons in the user interface. Great comfort thanks to Devices Panels. The Home Center 2 interface gives you easy control over certain groups of devices responsible for the same functionality - heating, air conditioning and garden watering. Thanks to Devices screen, you can easily schedule operations for these groups of devices based on the day of the week or the time of day.

- Z-Wave control unit
- Operation via web browser and app (iOS, Android)
- Managing multiple Z-Wave actuators and sensors
- Graphical user interface and built-in script language
- Automatic data backup / recovery
