Product Description

RF Elements ABRACAM-UVC-P - AbraCam(TM) Pendant for UVC Dome, Bracket for (TM) UVC Dome

AbraCam(TM) Pendant for UVC Dome enables a fast and easy installation of UVC Dome cameras on solid surfaces with an additional distance from the ceiling.

The UVC Dome camera was originally designed only for an installation in ceiling tiles. AbraCam(TM) Pendant for UVC Dome increases the possibilities of placing the camera in virtually any indoor environment and exactly where you need it to be.

The distance from ceiling is variable via stackable aluminum rods (1+4 included in package). This helps to decrease the viewing distance of the scene in case of high ceiling clearance areas (storage, halls, etc), and also eliminates IR reflection from (otherwise) nearby ceiling.

The bracket is for indoor use only.

TECHNICAL DATA

- Materials
 - UV stabilized and weather resistant ABS plastic
