📄 Product Description

TRITON RUA-15-AS4-CAX-A1 - Wall-mounted 19" cabinet, 15 HU, 395 mm depth

RUA wall-mounted cabinet is one of the one-sectioned wall-mounted cabinets. Thanks to removable side panels, installed devices are very easilyaccessible.

Cabinet has a robust welded construction. High quality processing andthe up-to-date technology ensure a perfect look of the cabinet andmaximal loading capacity of 30 kg.

Cabinet door is glass standardly but it can be steel or perforated asrequired. The hinge system enables almost 180° wide opening of the door. Doors can be easily removed.

REMOVABLE SIDE PANELS:

Removable side plates enable access to the installed devices from the rear side without demounting.

Blanking panels for installation of cooling ventilators:

RUA has now in all its versions six break-out blanking panels forinstallation of cooling ventilators RAB-CH-X30-X1 (three are in theupper and three in the lower part of a cabinet).

RUA cabinet enablesinstallation of devices that could not be cooled sufficiently inwall-mounted cabinets in the past and therefore had to be installed into free-standing cabinets only.

ADJUSTABLE VERTICAL RAILS:

One pair of vertical 19 rails is freely adjustable in any depth of the cabinet. This simplifies mounting of the device and organisation ofconnecting cables.

BREAKOUT-TYPE BLANKING PANELS:

Cable openings covered with breakout-type blanking panels are ready inthe top, bottom and rear part of the cabinet. Use a plastic frame and a blanking panel with a brush, that are parts of the cabinet supply, toseal the cabinet opening against dust penetration.

Size in mm:

- 770 x 665 x 395
