Item no.: 316937
shipping weight: 9.90 kg
Manufacturer: Triton

Product Description

TRITON RAC-PO-X68-XD - Universal Base for Free-Standing Cabinets, 600 x 800 mm, 1500 kg load capacity

The base is fully universal, which means that it is usable for all types of free-standing cabinets except ROA, RDA, RDE and RSX. The base consists of two side panels which correspond to the depth of the cabinet, and two cover panels (front and back) with a corresponding width. Supply includes

- 2x side base panels with a cable entry (with breakout-type blanking panels)
- 2x cover with cable openings (with breakout-type blanking panels)
- 1x cover with a filter
- 1x anti-dust brush strip
- Assembly material

The base is delivered dismantled. A second dust filter for the second cover can be easily ordered later. The base always exactly copies the ground plan of the cabinet regardless of installation of filter. The base is 120 mm high.

NOTE: The base is prepared for the installation of stabilisers, which are highly recommended to use on cabinets with sliding servers.
