📄 Product Description

AGS05-2.5GL - 2.5 Gbps unmanaged Ethernet switch

AGS05-2.5GL is a 5-port 2.5 Gbps Ethernet switch with loop detection.

This multi-Gigabit unmanaged Ethernet switch is a plug and play device with enterprise-level quality features. As a cost-effective solution, it allows to increase network bandwidth by more than twice (from 1 to 2.5 Gbps), using existing Cat. 5e (or better) cabling infrastructure.

Thanks to highly reliable internal components, features like auto-negotiation, non-blocking 25 Gbps switching capacity, flow control as well as a fanless case design, this device will be the perfect choice for SMB or home users.
