📄 Product Description

Triton RAX-MS-X18-X1 - Plastic frame for cable entry, 370 x 90 mm

Cable entries in Triton cabinets are covered by break-out styleblanking panels, which are fixed to the body of the cabinet by afew metal pins. Once the blanking panel has been broken out, there canremain sharp edges, which can damage the installed cable or injurea worker. Therefore Triton developed a plastic protector frame to avoidsuch risk. The frame is installed by simple click-in into the open cable entry and is part of the accessory pack of each rack.

There are two versions of this frame: for wall-mounted cabinetsand for free-standing cabinets.

The frame can be also combined with a brush blanking panel, which ispart of the accessory pack of each cabinet as well.
