Product Description

WiBOX Medium Outdoor Enclosure without Antenna

This box was designed for client side installations as well as for wireless bridges (medium range) and for base station system integrations (sector antennas of different frequencies working in one box). Its the ideal solution for indoor and outdoor hotspots. The available space (25 x 25 cm) allows for the installation of bigger radio boards (e.g. RB433 series, RB435 with aminiPCI radio module).

The box comes with single and dual polarity antennas working at different frequencies.
