Product Description

RF Elements HG3-TP-S70 - Symmetrical Horn TP Antenna Gen2 Horn Antenna with TwistPort(TM) Connector

Symmetrical Horn Antennas have a symmetrical beam pattern with no side lobes. They offer excellent noise rejection and supreme scalability options. They are perfect for high-density AP clusters and dense radio co-location.

Symmetrical Horn TP Antennas Gen2 feature our industry-changing TwistPort(TM) connector, a patent-pending quick-locking waveguide port. TwistPort(TM) is virtually lossless and revolutionary easy to use.

Symmetrical Horn TP Antennas Gen2 feature multiple improvements on RF performance and industrial design, incl. an optically lighter antenna body and significantly improved antenna bracket. The radome is made of more resistant material and the whole range of Gen2 antennas only uses two different radome sizes.
