Product Description

Digitus 19" Patch Panel - Cat. 6, 24 Ports, Unshielded, Black, class E, up to 250 MHz The patch panel has a height of 1 U and was designed for installation in 19" server cabinet. There are 24 unshielded RJ45 jacks at the front, which are connected to LSA connection modules at the back. For easier installation, the color code in accordance with EIA/TIA 568 A & B has been imprinted. To relief the strain on the connection modules, the cables can be fastened at the back using cables ties.
