shipping weight: 0.10 kg
Manufacturer: Triton

Product Description

Triton RAX-MS-X74-X1 - Conversion Kit for Installing your own Semi-Cylinder Lock

The new version of the Triton plastic swing handle is a revolutionary novelty. By simply replacing the plastic module, a classic or semi-cylindrical lock insert can be selected. Even in operation, you can upgrade a fully equipped cabinet to a higher level of security by simply replacing some parts, if necessary to a system with master key or similar. The half-cylinder insert must have an adjustable rotatable pin.

The handle is not compatible with the older model.

We have been offering these systems for several years, and especially cabinets with a higher degree of protection can not do without them. With the new handle, it is now also possible to use a wider range of multi-point lever and slide locking systems from renowned companies.
