ASX00006 - Arduino MKR ETH Shield

from **27,11 EUR**

Item no.: 326466
shipping weight: 0.10 kg
Manufacturer: Arduino

Product Description

Arduino MKR ETH Shield

Are you developing a project for an environment where wireless connections are unavailable or would be inefficient? The MKR ETH shield allows to have a wired Ethernet connection between your MKR board and your network or the Internet. This is particularly useful for devices located where either electromagnetic noise is a problem or there are special safety requirements.

- Connectivity: Ethernet
- Connector: RJ45 female
- SPI SD card slot: Yes
- Circuit operating voltage: 3.3 V
- Compatibility: MKR boards
