Product Description

TP-Link OC200 - Omada Cloud Controller Dedicated In Network Centralized Management

The OC200 Omada Cloud Controller dedicate to provide centralized management for the whole Omada network. Monitor statistics in real-time, view a graphical analysis of network traffic, create a captive portal, upgrade and reboot your system, and easily scale your network to boost your business. Free Cloud Management – Anywhere, Anytime

Omada offers free cloud access to its centralized management platform. Take your network with you, wherever you go. Guest Network with Facebook Wi-Fi and SMS Login

Visitors have access to secure Wi-Fi with captive portal and wireless isolation technology. Newly added SMS authentication simplifies the connection process, while Facebook authentication raises the social media profile of your business. Even More Convenient with Omada App

Remotely access and configure the OC200 from the convenience of your smartphone, wherever you are in the world. Package contains
