Product Description

USB Stick (US frequency)

This USB Stick connects a PC or any other computing platform with USB interface to a wireless Z-Wave network. A third party controller software compatible to the Sigma Designs Serial API is required to use the functions of the device. The third party software plus this UZB realize a static controller to manage and use Z-Wave devices of various vendors. This stick works with all certified Z-Wave devices regardless of its vendor or date of origin. The Sigma Designs Serial API specification is available to all owners of a Sigma Designs Z-Wave SDK. Please note that this product does not contain a license to run Z-Wave.Me's controller software Z-Way. You can however upgrade the stick to accommodate this function using a licensing key ZME_ZWAYLIC1.

ATTENTION: Use of this device may be restricted or prohibited in some countries due to the frequency ranges used. Please inform yourself at the authority responsible for your country.

- Article Dimensions (WxHxL): 16 x 34 x 8 mm
