AEOEZWA005 - TriSensor

from **68,45 EUR**

Item no.: 327112
shipping weight: 0.10 kg
Manufacturer: Aeotec

Product Description

Aeotec TriSensor

3 different sensors are crafted into Aeotec TriSensors impossibly small finish. A motion sensor to monitor a rooms occupancy, a temperature sensor to manage its environment, and a light intensity sensor to manage connected lighting. At only 1.77 inches in size and weighing only 50 grams, Aeotec TriSensor is really small. That means it can be placed almost anywhere in your home. TriSensor offers 4 different installation possibilities: in the corner, on a shelf, beam or in the Aeotec Recessor.

The sensor detects motion in up to 7.5 meters distance. It can also be adjusted and calibrated to it needs, e.g. to avoid an alarm by a pet.

The temperature sensor is accurate and detects temperatures in the range from -10°C to 50°C (+/- 1°C). The temperature can be used in connection with heating device.

Furthermore the Aeotec TriSensor can control a directly associated device, if the temperature goes above a configured level.

Measure the light intensity from 0 - 30000 Lux and automate your ambient light in depending on the daylight.

Specifications:

- TriSensor with motion, temperature and light sensor
- Motion: Accurate to 7.5m
- Temperature: -10°C ~50°C/ +/- 1°C
- Light: 0~30000 Lux, +/-3%
- Battery powered with CR123A Lithium battery
- Battery lifetime up to 3 years
- Z-Wave S2 Security
- Z-Wave Plus

Scope of delivery:

- TriSensor with wallmount
- CR123A Battery
- Multilingual manual
