AEO_ZW089 - Recessed Door Sensor

from **33,91 EUR**

Item no.: 327088
shipping weight: 0.10 kg
Manufacturer: Aeotec

Product Description

Aeotec Recessed Door Sensor

No more large and conspicuous contact sensors on expensive doors and windows. Door / Window Sensor 6 by Aeotec is small, nearly invisible and paintable. It can be easily mounted onto the corner of a door or window using double-sided tape. Furthermore, the flat sensor is paintable in a color that meets the doors or windows color. The Recessed Door Sensor by Aeotec is a small and compact door sensor, that tells you and your Z-Wave network if a door is open or closed. It is nearly invisible, as the sensor is installed with the help of a slight drill hole hidden away on the top of your door. Installing Recessed Door Sensor is easy, as you only must add it to your home network activating its battery and associating it with your Z-Wave system.

Features:

- Small and compact door sensor
- Invisible installation into a drill hole
- Wireless Technology: Z-Wave Plus
- Dimensions: 20 x 76 x 20 mm
