RTMX-MDBOX - Turris MOX D (SFP)

39,89 EUR

Item no.: RTMX-MDBOX
shipping weight: 0.10 kg
Manufacturer: Turris Omnia

Product Description

Turris MOX D (SFP)

The Turris MOX is a unique modular router suitable for small and medium enterprises, geeks and the households of all users who are aware of the internet's risks. Thanks to its secure default configuration, automatic firmware updates and adaptive distributed firewall, the product is very secure. The Turris MOX is also open source – it runs a free Linux operating system (based on OpenWrt) on open hardware. You can buy a Turris MOX as a complete set (Pocket Wi-Fi, Power Wi-Fi and Classic) or build your own. For that you will need the basic set MOX Start which you can expand with one or more modules (MOX B, C, D, E, F and G) and add-ons (MOX Wi-Fi add-on (SDIO), MOX Wi-Fi add-on (mPCIe) and MOX PoE add-on). [Key characteristics of the MOX D \(SFP\) module](#)

The MOX D module contains an SFP connector for an optical connection with speeds of up to 2.5 Gbps. [Compatibility](#)

There can be only one MOX D module in the configuration; the SGMII bus is terminated there. For this reason, MOX D cannot be combined with MOX C.

This module can be used only as an extension in a set. You will need at least MOX Start. If you're combining it with other modules, make sure they are compatible.

- WAN port: 1x up to 2.5 Gbps SFP
- Internal interfaces: 1x 64 pin connector for connection additional modules
- Size (W x D x H): 105 x 58 x 14 mm (without case)
- Operating temperature: 0°C to 40°C (40°F to 104°F)
- Relative humidity: 10% to 90% RH
- HW extensibility: Additional MOX modules due straddle mount PCIe 64 pin connector
