Product Description

CRS326-24S+2Q+RM - Cloud Router Switch 326-24S+2Q+RM with 650 MHz CPU

If you are working with a substantial amount of data – like providing Internet access or maintaining a huge data center – this is the perfect upgrade for your setup.

CRS326-24S+2Q+RM is MikroTik's first product with 40 Gbps QSFP+ ports for a remarkably fast and stable fiber connection.

Overall it has two 40 Gbps QSFP+ ports and twenty-four 10 Gbps SFP+ ports, which provide a total nonblocking throughput of 320 Gbps and a switching capacity of 640 Gbps with a forwarding rate of 252 Mpps with most common packets.

CRS326-24S+2Q+RM is easy to manage – it has a full size USB port for configuration and dual power supply for redundancy – no unexpected downtime, your clients and colleagues will be thankful!

You can choose between MikroTik's legendary feature-packed RouterOS for booting or a simpler, but still powerful SwOS. If you would like the ability to use routing and other Layer 3 features in your CRS, use RouterOS.
