BPI-NANO ROBOT BOARD - Banana Pi BPI NANO Robot Board

from **7,13 EUR**

Item no.: 331224
shipping weight: 0.10 kg
Manufacturer: BPI

Product Description

Banana Pi BPI NANO Robot Board

This robot board is designed for BPI-NANO and nano-compatible plantines. The BPI-NANO Robot Board with Motor Drive Expansion Plate, available in the BPI-NANO Controller, supports dual-circuit motor control. The standard pin design interfaces enable the development of small mobile robots.

- Driver chip: L293B
- Operating voltage: 5 V DC
- Motor drive voltage: 7-12 V DC
- Max. driving current: 1 A (per circuit)
- Pin for motor drive: Pin 4/5/6/7 (Arduino controller)
- Dimension: 56 x 57 mm
