## BPI: BIT BASE GPIO - Banana Pi - GPIO Expansion Board

**8,45 EUR**

Item no.: 331232  
shipping weight: 0.10 kg  
Manufacturer: BPI

### Product Description

BPI:Bit Base - GPIO Expansion Board

The BPI:bit base is a GPIO expansion board and the base GPIO board. This can also be used on Micro:Bit.

GPIO (General Purpose Input/Output) is a general purpose pin on an integrated circuit whose behavior, whether used as input or output contact, is freely definable by logical programming. Thus, these contacts have no purpose, are therefore unassigned and can therefore be used by the user in many ways.
