

Item no.: 331229 BPI-9600 POE MODULE - Banana Pi (for BPI-P2 Zero)

Product Description

Banana Pi BPI-9600 PoE Module (for BPI-P2 Zero)

The BPI-9600 series of modules are designed to supply power with a conventional twisted pair Category 5 Ethernet cables, conforming to the IEEE 802.3af Power-over-Ethernet(PoE) standard. The BPI-9600 signature and control circuit provides the PoE compatibility signature and power classification required by the Power Sourcing Equipment (PSE) before applying up to 15 W power to the port. The BPI-9600 provides a class 0 signature.

The DC converter operates over a wide input voltage range and provides a regulated output. It also has a built-in short-circuit output protection.

Applications

- IoT gateway
 IP cameras
- Wireless access point Security and alarm systems
- VOIP telephone
- Point of sale network terminal equipment
- IEEE 802.3af compliant
- Input voltage range 36 V to 57 V
 Integral high efficiency DC converter
 Low output ripple and noise
 High performance with the second second
- High performance with low price
 Short-circuit protection
- Adjustable output
 Optional multi-voltage output 3.3 V/ 5 V/ 12 V/ 24 V
- Transformer isolatio, 1500 V isolation (input to output)
 Easy to use, with a minimum number of external components
