Product Description

Walli Dimmer

With the FIBARO Walli Dimmer you always adjust your lighting to the respective occasion. The small flush-mounted module is combined with a visually appealing switch, which can be used to dim the existing lighting.

The small FIBARO Walli dimmer measures the active power as well as the energy consumption. With its LED ring you are informed about the current energy consumption. The installation is easy and can be carried out according to your individual wishes. Use the included switch or your own switch series (GIRA System 55, Legrand Celiane, Schneider Odace).

The FIBARO Walli Dimmer can also be used in combination with the well-known FIBARO Bypass 2 to dim and switch LED lamps and energy-saving lamps without flickering.
