Product Description

CYBERPOWER PROFESSIONAL P0420SUDO-DE 4-way power strip with USB

CyberPower P0420SUDO-DE is ideal for overvoltage protection in office use. The surge protector contains a metal oxide varistor (MOV) that absorbs the energy peaks that can be caused by electrical surges during storms and thunderstorms. You can supply USB and your mobile device accessories with power or quickly charge them via the USB charging connections in the surge protection. The product also offers overload protection, EMI / RFI filtering, an impact-resistant housing and more so that your electronic devices are reliably protected.
