📄 Product Description

LCD cable tester RJ45 / RJ12 / BNC / USB

With this cable tester from Delock, the assignment of different cable types can be tested quickly and easily. There are connections for modular cables, network cables, BNC and USB cables. Errors in the assignment are clearly shown on the illuminated LCD display. Network cables can be tested for split pairs that degrade performance due to crosstalk. In addition, the length of the connected cables can be measured. The remote unit can be used to check cables that have already been laid.

- 4 in 1 cable tester for RJ45 / RJ12 / BNC / USB
- Matrix LCD display with backlight
- 4 control buttons
- Display of interruption, short circuit, crossed wires
- Detection of split pairs (crosstalk)
