Product Description

Extreme Cooling Fan Kit For Raspberry Pi

The Extreme Cooling Fan Kit For Raspberry Pi is a brandnew cooling system for your Raspberry Pi 3B+. It's a completely new radiator and a very cool cooling system. It fits all of your cases so you do not need to buy another case for your Raspberry Pi.

The fan is powerful but still quiet when it is running. Two aluminum blocks will touch the MCU tightly which is good for the heat dissipation.

- Designed for Raspberry Pi 3B+
- Very quiet
- Easy to assemble
- Cool appearance
- Good heat dissipation
- Safe to use
