Product Description

NOD_DRB-1-1-00 - NodOn DIN Rail Box for Zigbee or EnOcean Relay Switches (5 pcs.)

The NodOn DIN rail box allows the installer to directly wire the relay switches in the electrical panel. Ideal for new installations and renovation, this DIN rail box allows a real time saving before the installation and on site.

Features:

- DIN rail compatible type ? EN 50022: The DIN rail box can be installed in almost all of the electrical panels of the residential and tertiary sectors
- Compatible with NodOn relay switches: The DIN rail box is compatible with the On/Off Lighting Relay Switch, the Roller Shutter Module, the Multifunction and Pilot Wire Relay Switches
- Quick relay switch/box mounting: The relay switch is quick to install inside the DIN rail box thanks to the inside pins and the outside slots
- Simple wiring in the electrical panel: The DIN rail box is easy to wire thanks to its terminals 1 to 6
- Compatible relay switches: SIN-X-1-XX, SIN-X-2-XX, SIN-X-RS-XX, SIN-X-FP-XX
- Compatible DIN rail: Type ? EN 50022
- Maximum intensity: 16 A
- Operational temperature: -20°C to 40°C
- Protection rating: IP20
