📄 Product Description

CCR2004-1G-2XS-PCIe - Cloud Core Router 2004-1G-2XS-PCIe

Save space in your server room by adding a real CCR2004 ... within the server itself! This unique product combines a simple 2x 25 Gigabit PCIe Ethernet adapter with the impressive capabilities of a fully-fledged router.

By default, the PCIe interface will show up as four virtual Ethernet interfaces. Two interfaces in passthrough mode to the 25G SFP28 cages. Remaining two virtual Ethernet-PCIe interfaces are bridged with the Gigabit Ethernet port for management access. The user can configure all interfaces and settings freely since it is running fully functional RouterOS here.
