Product Description

iButton key - magnetic, compatible with iButton reader CZ0M 120C

One of the implemented features for fleet management devices is the 1-Wire data protocol, which enables the connection of iButton. The iButton device is perfect for any application where AVL data needs to travel along with a person or object identification.

iButton is a fleet management tracking solution in the following cases:

- Driver authorization – gives ability to use vehicle only for specific iButton owners and identify which driver is on the road.
- Immobilizer – without iButton authorization you can not run engine starter and use vehicle.
- Auto Geofencing – gives ability to know when car leaves customized areas without iButton authorization.
- Magnetic iButton key, compatible with iButton reader CZ0M 120C
