Product Description

OBD II Power Cable (female)

The two-wire connector is used to connect FMB001/FMB010/FMC001/FMM001/FM3001 devices to 10-30 V DC power supply for configuration in the office. The length of the cable is 23.5 cm (+/- 0.5 cm), peeled 0.5 cm (+/- 0.1 cm).

Teltonika created this power cable to connect devices easily and swiftly in your testing location, including the office. Configuration can be made right on your table for FMB001/FMB010/FMC001/FMM001/FM3001 devices. Also, it is a very convenient way to run the tests of OBDII device functionalities, allowing you to check how the device will operate once mounted in the vehicle.

- Plug with two wires for connecting to external voltage in the office
