

Item no.: BPI-FPGA

BPI-FPGA - FPGA Extend Board with Xilinx Artix-7 100T

from **82,13 EUR**

Item no.: BPI-FPGA
shipping weight: 0.10 kg
Manufacturer: BPI

Product Description

BPI-FPGA - FPGA Extend Board

Now with the Trezz Electronic TE0725LP-01-100-2D, BPI-FPGA is a low cost small-sized FPGA module integrating a Xilinx Artix-7 (15T-100T) and 32 MByte Flash memory for configuration and operation. The 2x 50 pin headers with a 2.54 mm standard pitch are perfect for breadboard or low cost dual layer PCB.

- Xilinx Artix-7 XC7A100T-2CSG324C/XC7A100T-2CSG324I
- Commercial temperature grade
- 32 MByte Flash memory
- 2x 50 pin headers with 2.54 mm pitch, ideal for breadboard use
- 1.8 V single supply with on board voltage regulators
- 95 I/O's (42 + 42 + 3 + 8)
- 25 MHz system clock
- I2C EEPROM
- 7.3 x 3.5 cm form factor
- JTAG/UART connector
- One user LED
- Optional HyperRAM (8 bis 32 MByte) or HyperFlash
