from **221,03 EUR**

Item no.: 357746
shipping weight: 1.40 kg
Manufacturer: Delock

📄 Product Description

This docking station from Delock can be connected to a computer with USB-C™ DP Alt Mode or Thunderbolt™ 3 port and provides a variety of interfaces. Up to three monitors can be operated simultaneously at the DisplayPort outputs and the HDMI output. Four integrated USB ports allow the use of peripherals, and connections for a headset and Gigabit network complete the features.

The product is an MST hub and supports the extended desktop configuration of DisplayPort. This allows multiple monitors to be combined into one large display. The maximum resolution, for simultaneous playback on two or three monitors, depends on the system and the connected hardware.

The docking station has a USB Type-C™ Power Delivery port. If this port is connected to the host device, such as the MacBook, it is charged during operation with up to 85 watts.

The Delock docking station can be operated either horizontally or vertically. A stand is included in the scope of delivery for vertical operation. In addition, the docking station can be attached to a 50 mm VESA mount. The corresponding screw threads are provided on the underside.A security cable can be attached to the Kensington socket to protect the docking station from theft.
