Walli Dimmer Unit

from **53,52 EUR**

Item no.: 357978
shipping weight: 0.50 kg
Manufacturer: Fibaro

Product Description

With the FIBARO Walli Dimmer Unit, you always adjust your lighting to the respective occasion. The small flush-mounted module is combined with a visually appealing switch that can be used to dim the existing lighting.

The small FIBARO Walli Dimmer Unit measures both the active power and the energy consumption and converts this into a visual signal by means of the LED ring. Installation is child's play and can be carried out according to your individual wishes.

FIBARO Walli Dimmer Unit is compatible with the switch ranges of other manufacturers: GIRA System 55, Legrand Celiane and Schneider Odace. An adapter is required for proper installation.

Check the specifications to see which devices work with FIBARO Walli. If you are happy with the look of your current sockets or switches, just change the insert and enjoy many smart features without having to change the design.

The FIBARO Walli Dimmer Unit can be used for the following light sources:

- conventional incandescent lamps and halogen lamps
- ELV halogen lamps and dimmable LED lamps (with electronic transformers)
- LV halogen lamps (with ferromagnetic transformers)
- dimmable LED lamps
- dimmable compact fluorescent lamps CFL tube

In addition to the Fibaro Walli Dimmer Unit, the FIBARO Bypass 2 (FIB_FGB-002) is available directly in our shop. You need this to dim or switch LED lamps and energy-saving lamps without flickering.

- Dimmer for existing lighting systems
- Scene control
- Can be used with FIBARO Bypass 2
- Power supply: 110 - 230V, 50/60Hz
- Safety: S2
- SmartStart capable
