Item no.: 358025
shipping weight: 0.50 kg
Manufacturer: Aeotec

📄 Product Description

Detect unwanted damp spots directly: With the Aeotec Waterleak Sensor you are well prepared for possible leaks. The sensor can detect leaking water on the top and bottom, enabling early intervention and damage minimisation.

Simply place the sensor where water could leak, for example under the sink, the washing machine or even in the cellar. As soon as leaking water is detected, you will receive a notification so that you can take immediate action. The notification can be made via the SmartThings app and via compatible smart signalling devices such as sirens and lights.

Thanks to its slim and compact design, the Aeotec Water Leak Sensor can be optimally placed in niches and crevices to detect leaking water as early as possible.

Important: To be able to use all functions, you also need an Aeotec Smart Home Hub or other Zigbee Hub.

- Monitoring water leaks and flooding
- Control the temperature
- Receive alerts via the SmartThings app when the sensor detects water or the temperature changes
- Aeotec smart home hub or other Zigbee hub additionally required
- Power supply: CR2 battery
- Zigbee 3.0
- Regions: EU
- Certifications: Zigbee, FCC/IC/CE
- Article dimensions (WxHxL) 59 x 20 x 42 mm
- Battery CR2
- IP class 20
