

Item no.: 357931

Range Extender 7 (Twin Pack)

from **68,90 EUR**

Item no.: 357931
shipping weight: 0.50 kg
Manufacturer: Aeotec

Product Description

Wireless technology isn't always perfect, so Aeotec has developed the Range Extender 7 - a simple plug-and-play device that perfects your home automation system. It receives signals from Z-Wave and Z-Wave Plus, amplifies them and then sends them back to your Z-Wave automation network, increasing range and reliability.

The Aeotec Range Extender 7 improves the quality of your automation system and it increases its performance. Because the extender is based on Gen7 technology, it offers up to 250% more range and up to 50% faster response than other technologies without Gen7.

Simply plug the smart device into a wall socket, connect it to your Z-Wave network and the extender will automatically start enhancing any weak Z-Wave signals that are within range.

The Aeotec Range Extender 7 is based on the most advanced wireless automation technology available. It combines Aeotec's unique Gen7 technology with Z-Wave Plus V2 and the 700 series. This enables the smart device to offer a wide range of enhancements, including S2 security and SmartStart installation.

The Aeotec Range Extender 7 is compatible with many certified Z-Wave gateways.

- Z-Wave 700 series - higher range, more efficient and better performance compared to older generation series
- Z-Wave signal amplifier as a simple plug-and-play device
- Radio technology: Z-Wave Plus V2
- SmartStart capable
- S2 Security
- Plug type E/F
- Power supply: 230 V 50 Hz, max: 150 mA
- Power consumption: 1.2 W
