Motion Sensor Pro (Zigbee)

from **32,29 EUR**

Item no.: 358004
shipping weight: 0.50 kg
Manufacturer: frient

Product Description

3 in 1 sensor (motion, light and temperature). At home, even when you are away. Imagine always having a friend (frient) who registers movements in your home and watches over your family. Someone to let you know if anyone moves around your home while you are away. Someone to keep your home safe and let you know if your loved ones need help right now.

Relax by having control over your home. Place the frient Motion Sensor Pro in different rooms and it will instantly let you know via the app if something or someone moves while you are away. Program the motion sensor to automatically turn on the lights when you enter a room. Or silence the music when you leave the room. But that's not all, because the motion sensor can also act as a kind of health monitor for your elderly relatives who live alone. Check on your beloved grandma from afar and be alerted if something is wrong with her. Relax because your frient is there for you when you or your loved ones need it.

Detect movement in every corner of your home. Your new smart frient watches your home from different angles and makes sure that even the farthest corner is safe. From its elevated position, your motion sensor can give you an overview of the entire room as well as keep an eye on doors and windows. Mounting the Zigbee-based motion sensor is child's play with the included adhesive tape.

Unlike the FRIZMOSZB-141, the frient Motion Sensor Pro (Zigbee) offers you a temperature and light sensor as well as tamper protection.

- Motion, light and temperature sensor
- Power supply: Battery 2 x AA, replaceable
- Battery life: 3 years, reporting every 2 minutes
- Battery level and low battery warning can be sent
- Radio sensitivity: -92 dBm
- Output power: +3 dBm
- IP class: IP30
- Operating temperature 0 to +50°C
- Relative humidity 5% - 85%, non-condensing
- Motion sensitivity range: 9 m
- Viewing angle: 45° up/down, left/right
- Temperature measuring range: 0 to +50°C
- Temperature resolution: 0.1°C (accuracy ± 0.5°C)
- Two trigger thresholds: one for detection and one for alarm
- Zigbee 3.0
- Complies with CE, RoHS and REACH directives
- IP class IP30
