

Item no.: 362093

61958 - Navilock (KFZ) Power supply DC >2 x USB A

from **7,32 EUR**

Item no.: 362093
shipping weight: 0.10 kg
Manufacturer: Navilock

Product Description

With this USB charging adapter from Navilock, two USB devices can be operated and charged in the car or lorry via the cigarette lighter. It supports a power supply totalling 2100 mA for both USB ports together. This means that the entire 2100 mA is only made available when one USB device is connected. Accordingly, the voltage is divided between both USB ports when two USB devices are connected. The minimal size of the adapter means that it can remain permanently plugged into your cigarette lighter and the cover can still be closed in some cars. Technical data- 2 x USB type A socket- Input: DC 12-24 V- Output: DC 5 V / 2100 mA- Overcurrent protection- Operating temperature: -40 °C ~ 65 °C- Storage temperature: -40 °C ~ 85 °C- Package contents- DC car charging adapter- Operating instructions
