Shelly Plus 1PM

from **23,68 EUR**

Item no.: 357940
shipping weight: 0.50 kg
Manufacturer: Shelly

Product Description

Next generation appliance control with precise power measurement.

From automating your lighting to controlling electrical appliances, the Shelly Plus 1PM gives you precise power measurement and free data storage in the cloud. Due to its compact size, the relay fits behind any wall switch or socket. Installation takes less than 10 minutes.

Track your electricity consumption and save money.

In the future, you will be able to monitor and analyse your electricity consumption to save money on electricity bills. Shelly Plus 1PM has a built-in accurate electricity meter that allows you to measure electricity consumption. You can use the free data storage for analysis. The smart device also detects excessive electricity consumption above a predefined value and notifies you immediately. Alternatively, the detected power guzzler can also be switched off automatically.

Automate your electrical devices and control them remotely.

With Shelly Plus 1PM, it is possible to automate every electrical appliance in your home and control them on the go. The smart Shelly Plus 1PM can also control kitchen appliances and household appliances with large loads. The device allows you to accurately measure the power consumption of connected appliances and turn them on or off on the go - no matter where you are.

Highly compatible.

Use your favourite voice assistant to control the Shelly Plus 1PM. The relay is compatible with most popular voice assistants such as Amazon Alexa.

No hub required.

You can control the Shelly Plus 1PM directly from the Shelly Cloud app without the need for a hub. Manage and control your home or facility, set scenes and schedules, and adjust settings wherever you are - via cloud access or just the local network!

- Power supply: 110-240V $\pm 10\%$ 50/60Hz AC, 24-240V DC
- Maximum load per channel: 16A
- Operating temperature: 0°C \div 40°C
- Wireless/Wi-Fi: 802.11 b/g/n protocol (2.4 GHz)
- Power consumption: < 1.2 W
- Control via REST, CoAP and MQTT
- Power consumption measurement with data storage: Enables accurate monitoring of power consumption
- Bluetooth: Add devices quickly and easily via Bluetooth connection with the Shelly Cloud App
- Extremely fast processor: For instant command execution and notification
- Enhanced safety: Over-temperature protection with software thresholds to prevent failures
- Improved API interface: Wide range of cloud connections and local integrations
