Walli Switch

from **56,10 EUR**

Item no.: 357981
shipping weight: 0.50 kg
Manufacturer: Fibaro

Product Description

With the FIBARO Walli Switch, you can also switch off the light when you are on the move. The small flush-mounted module is combined with a visually appealing switch that can be used to switch one or two light sources.

The small FIBARO Walli Switch measures both the active power and the energy consumption and converts this into a visual signal by means of the LED ring.

Installation is child's play and can be done according to your individual wishes. Use the switch supplied or your own switch series (GIRA System 55**, Legrand Celiane, Schneider Odace).

The FIBARO Walli Switch can be used for the following light sources:

- conventional incandescent lamps and halogen lamps
- LED lamps
- fluorescent tubes
- electronic transformers (for ELV halogen lamps and LED bulbs)
- ferromagnetic transformers (for MLV halogen lamps)

Features:

- Switching of one or two light sources
- Scene control
- Power supply: 110 - 230V, 50/60Hz
- Safety: S2
- SmartStart capable
- Radio technology: Z-Wave Plus
