

Item no.: 357974

euFIX S214 DIN adapter (with switch)

from **36,87 EUR**

Item no.: 357974
shipping weight: 0.50 kg
Manufacturer: Eutonomy

Product Description

The euFIX adapters facilitate the integration of the FIBARO® system into the infrastructure of buildings: houses, offices, warehouses and hotels. The euFIX S214 adapter allows you to safely install the FIBARO® FGS-214 module on the DIN TH35 top-hat rail in your electrical switchgear. The adapter consists of the housing, which optimally adapts to the dimensions of the standard apparatus for the rail TH35, and the carrier plate on which the FIBARO® FGS-214 module is fixed. The carrier plate contains control buttons as well as screw terminals that guarantee you a secure connection of the power supply as well as the input and output signals. In the upper part of the housing are the microswitches S1 and S2, which enable you to control the FIBARO® module for diagnostic purposes. In addition, you can use the S1 microswitch to register the module in your Z-Wave system. Alternatively, the microswitch can also be used to delete the module from the system without removing it from the adapter.

- Suitable for FIBARO® FGS-214 module
- Power supply: 230 V, 50/60 Hz
- Load current: 6.5A for resistive load
- Housing dimensions: 34.8 x 87.3 x 64.7 mm
- Cross-section of connecting leads: max. 2.5 mm²
- Operating temperature: from 0°C to +35°C
- Relative humidity: ? 95%, without condensation
