Product Description

RAX-MS-X17-X1 – Plastic frame for a breakout-type blanking panel 300 x 70 mm

Openings with breakout-type blanking panels fixed with several bonds are intended for cables entering into a cabinet. After breaking-out the blanking panel, sharp edges sometimes remain. They can damage a cable or injure the operator. To remove this imperfection, we have developed a plastic frame. The frame is to be fixed into the breakout by a simple click and it is included in every cabinet supply.

The plastic frame can be completed with a blanking panel with a brush (RAX-MS-X15-X1) which is also included in the supply.
