## BPI-A-011 LEVEL SHIFTING BOARD - Banana Pi BPI-A-011 - I2C Voltage Converting Module

**4,68 EUR**

Item no.: 320171  
shipping weight: 0.10 kg  
Manufacturer: BPI

### Product Description

Banana Pi BPI-A-011 - I2C Voltage Converting Module The I2C electric level conversion module is specifically designed for the Banana Pi. The module converts the 3.3 V of the I2C electric level to 5 V or vice versa. The module is made by NMOSFET and has a fast feedback and low power consumption. [Features](#)

- Strong anti-interference ability
- Pull-up resistor on board
- 1.8 V, 2.4 V, 3 V and 5 V voltage conversion

#### Typical application

- Interface electric level conversion

#### Ports

- 1x6 header

#### Product parameters

- Working voltage: 1.8 - 5.5 V
- 4 conversion channels
