Product Description

TRITON RAC-CH-X03-X3 - Fan Unit for Free-Standing Cabinet, 2 Ventilators, 30 W

These fan units are made especially for free-standing cabinets. They are installed as required into the bottom, top cover or door of the cabinet.

The fan unit is installed into the top cover from outside of the cabinet and into the bottom from inside of the cabinet. When installing the fan unit at the bottom of the cabinet, it is necessary to use an installation frame RAX-CH-XXX-X1 which is mounted using a double-sided adhesive tape. We recommend using a base under the cabinet to ensure sufficient air intake.

- Temperature adjustment: Bimetallic thermostat
- Specified voltage (V/Hz): 230/50-60
- Input: 30 W
- Number of ventilators: 2
