Item no.: P4S-347-SET
shipping weight: 0.10 kg
Manufacturer: PHPoC

📄 Product Description

PHPoC P4S-347-SET - PHPoC Wi-Fi Shield for Arduino + USB WLAN Adapter
The PHPoC Wi-Fi Shield for Arduino (P4S-347) is compatible with Arduino Uno orMega products. Equip the shield on your Arduino and connect a USBwireless dongle. After a simple network setup, you can connect yourArduino to the Internet. In addition to the network function, the PHPoCshield supports a wide range of APIs. So you can take advantage of a wider range. In particular, a built-in web application provides an easy webapplication control and network setup. Also, you can monitor the output of Arduino's serial monitor via web from a remote location in real time.Key Features

- Mounted on Arduino board (compatible boards: Uno & Mega)
- Power: DC 5 V (supplied from Arduino boards)
- Network controller: PHPoC interpreter
- Wireless LAN: IEEE 802.11b/g
- WLAN security: WPA-PSK/Enterprise
- Saves time information (RTC - battery backup)
- Web settings (Smartphone or PC)
- Embedded web applications: Serial monitor, remote control (push), remote control (slide)
- SPI communication with Arduino board
- Supports IPv6
