Product Description

MikroTik RBLHGG-60ad - LHG 60G (60 GHz antenna, 802.11ad wireless)

The LHG 60G is a high-speed 60 GHz CPE unit for connecting to a 60 GHz AP at longer distances, enabling you to build a cost effective point to multipoint setup in the clean 60 GHz wireless spectrum.

Connect up to eight of these CPE units to a 60 GHz access point, such as the wAP60G AP or wAP 60Gx3 AP. For links up to 800 meters, this is the best alternative for wireless connections where 2 GHz and 5 GHz wireless space is crowded and unreliable.

The unit is equipped with a Gigabit Ethernet port for high speed connections and shipped with LHGmount and Aim tool for precision alignment. Included parts

- 24 V, 0.38 A power adapter
