📄 Product Description

19" rack system configurator for PC Engines APU6 boards, single slot
The VARIA 19" rack system is a high-quality, modular 19" enclosure system that can be used with PC Engines APU6 boards.Cost-efficiency through a space- and power-saving network component
The VARIA 19" rack system is a high-quality, modular 19" enclosure system offering compatibility for PC Engines ALIX and APU boards.
With the installation of an APU4 series board, the enclosure is ideally suited for use as an individual and/or redundancy system.
Network-based IDS intrusion detection, firewall, load balancing, redundancy, PPTP or PPPoE server are just some of the possible system solutions with this enclosure.
Optionally, hard disks, fans and two internal power supply units can be accommodated.
The high-quality material (hot-dip galvanised sheet steel with black powder-coated front panel) ensures stability and durability.Your high-quality individual imprint
The high-quality front panel can be printed with your design according to your individual specifications. The high resolution and outstanding image sharpness produce an impressive print result.
We will contact you about the design of the imprint after your order has been placed. We will be happy to assist you in preparing the print data for the final layout.
Please note that this option extends the delivery time by 4 to 7 working days.
Important: The optional storage media are not installed, but delivered separately. If you would still like them to be installed, please state this in the comments field when completing the order.
Scope of delivery:

- 1x 19" case (incl. single-slot cover), 1 U
- 1x screw set for mounting the boards
- 2x snap-on handles

- Form factor: 19 inch, 1 U
