Product Description

E9 Dear Beacon with Accelerometer

The dear beacon is a Bluetooth Low Energy proximity beacon, based on the new-generation BLE chip Nordic nRF52. It simultaneously supports multiple iBeacon and Eddystone (UID, URL, TLM) technologies and can be configured via the BeaconSET+ app.

The dear beacon was designed for humid application scenarios, as it is IP67 waterproof. It has been customized with an accelerometer sensor for various applications, like asset tracking, advertisement, etc.

Besides, it supports screw installation in some public places, and can be stronger and safer than adhesives. The battery can be easily replaced because of the rotating housing design.
