📄 Product Description

Branch board PI TCobbler Plus
The Adafruit T-Cobbler Plus is an add-on board designed for the B+ and Pi 2. This branch kit is T-shaped, making labels easier to read as all pins are labelled. It can branch all power, GPIO, I2C and SPI pins from the 40-pin header to a solderless plug-in board. This kit makes combining prototypes with the Pi effective and easy. The kit is designed for use with a Raspberry Pi in the 2x20 connector version and requires some soldering.
What is integrated?

- 40-pin ribbon cable
- T-Cobbler PCB
- 40-pin GPIO female connector
- Pin header strip

- 73 x 20 x 2 mm/2.9 x 0.8 x 0.08 in
- Width at the top of the T: 58 mm/2.3 in
- Weight: 7 g
