PIM556 - Pico Omnibus Dual Expander

from **24,83 EUR**

Item no.: 345790
shipping weight: 0.10 kg
Manufacturer: Pimoroni

📄 Product Description

Pimoroni Pico Omnibus
Double up your GPIO pins and attach two add-ons to a single Raspberry Pi Pico with Pimoroni's expansive Pico Omnibus!
Struggling to choose which Pico add-on to go for? Pico Omnibus lets you plug in two Pico Packs or Bases at once, or you can use the extra set of male GPIO pins to easily attach other devices, jumper wires or circuitry - very useful for prototyping. Pimoroni have added useful labels to all three sets of connectors, so you can be sure that all those lovely wires are going to the right places. They have also thrown in some little feet to keep everything solid.
Note: A Raspberry Pi Pico is not included.

- One landing area with labelled female headers for attaching to your Pico
- Two landing areas with labelled (mirrored) male headers for attaching add-ons
- 4x rubber feet
- Compatible with Raspberry Pi Pico
- 99% assembled - just need to stick on the feet
- Fully assembled
- No soldering required
- Dimensions: Approx. 94 x 52 x 12 mm (L x W x H, including headers)
