Product Description

Seeed Studio RS485 Addon Board For Raspberry Pi

RS-485 is a cost-effective solution in serial communication networks. It can be used up to data rates at 10 Mbit/s or distances up to 1200 m at lower speeds. This RS-485 shield is a standard add-on board for the Raspberry Pi. It is integrated with a simple screw terminal as well as DB9 interface.

- One driver and one receiver per part
- EMI noise minimization
- Transmission rate up to 2.5 Mbps
- No driver slew rate limitation
- Short-circuit current limited
- Fail-safe applications
- Compatible: Raspberry Pi 4
