shipping weight: 0.10 kg
Manufacturer: DesignSpark

Product Description

Camera Module CSI-2 with 1920 x 1080 pixels Resolution

The DesignSpark camera module by Entaniya enables the use of M12 mount lenses with your Raspberry Pi. The lens is optimised for daylight use with the inclusion of an Infrared (IR) filter within the lens. This module is supplied pre-assembled with a Raspberry Pi v2 camera, M12 mount and 220° fish-eye lens. This camera has interchangeable lenses and there is a possibility that dust may adhere to the sensor. Therefore, it is recommended to blow off the dust regularly.

- Image resolution: 3280 x 2464 pixel
- Video resolution: 1920 x 1080 pixel
- Sony IMX219PQ sensor
- 8 megapixel fixed focus
- RP-220 lens
